DETAILED ACTION

1. In view of applicants' argument, previous 102(e) rejection on claims 1 and 22 over Park et al'590 is hereby withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-3,12 and 22 are rejected under 35 U.S.C. 102(a) as being anticipated by Lu et al (Chemical Abstract for "Micropatterns Constructed from Au Nanoparticles", Chemical Communications, (9), pg.1056-1057 (2003)).

Full article will be sent out to applicants as soon as the Examiner obtains it. Only the Chemical Abstract is available at this time.

Lu teaches a self-assembly film made of 4-mercaptophenol-capped Au nanoparticles and *dial*zo group containing polymers of nitro-diazo-resin. Lu fabricates micropatterns from this self-assembly film by selective exposing it to UV light and developing with Na dodecyl sulfate aqueous solution. The 4-mercaptophenol (HS-C₆H₄-OH) teaches present thiol compound of Formula 1 and is the present 4-hydroxythiophenol of claim 3. Present specification (pg.6, lines 14-15) lists a diazo group as one of the photosensitive group. Therefore, Lu teaches present inventions of claims 1-3 and 12.

Allowable Subject Matter

4. Claims 4-10 and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Lu et al (the Chemical Abstract) does not teach or suggest neither present photoinitiator of claim 4 nor present composition of claim 5 which further comprises a conductive polymer and/or a non-conductive polymer.

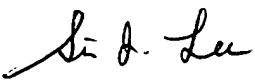

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sin J. Lee whose telephone number is 571-272-1333. The examiner can normally be reached on Monday-Friday from 9:00 am EST to 5:30 pm EST.
